

Environment Commitment

Going Green is the healthy, common-sense choice for a better future.

Our Commitment

The Starlight Children's Foundation is committed to embracing change and diversity to become a more effective force for a better future. We believe that everyone has a responsibility to the natural world. That is why we are not only committed to finding ways to protect the environment. But we are also committed to providing greener options and earth-friendlier ideas for our business.

What we are doing

The Starlight Children's Foundation is committed to making a better future for everyone. In order to be true to our commitment we are limiting the usage of water bottles, implemented a paper and can recycling program, ensured all Foundation collaterals are printed on FSC certified paper, shifted our quarterly newsletter to a monthly electronic one, and all bags used in our Hospital Happenings program are now 100% recyclable material.

What we are striving for

The Starlight Children's Foundation understands that building a better future will be an on-going process, as new programs and initiatives arise we will make every effort to implement them into our office and programs. Some initiatives we are currently working on involve replacing all florescent lighting to low-energy lighting, choosing venue providers that use Bullfrog power, and when possible going paper free when sending out invitations, teasers, etc.

For more information regarding our "Green" policies please feel free to contact Michelle Dicaire at michelle@starlightcanada.org or at 905-752-7827 X221.
